Tiger Electric and Dakota Territory Car Club installed 6 RV outlets and 4-50 amp outlets.

RV outlets were installed at-

Flower Nook

Dakota Western Insurance

Morland Building

Finder building (North Side)

Dave Mosbrucker's building

Super Valu lot- North Side

50 Amp outlets were installed at

2- Bowman Sales (North Side)

2- Sax Parking Lot

Extra outlets needed to be available so they could draw in a larger group of vendors. Many of the current outlets were old and needed to be updated as well, so Jory replaced those. These outlets are available for use by anyone at anytime. Some are wired in directly to businesses, so you would need to touch base with them prior to them being used. With this additional expense getting billed directly to the business, they may ask for a fee when outlets are in use. Hopefully with the option of having electricity available, this will help draw in vendors for future use.

Jory did have the car club pick up RV outlets at Menards as the cost on his were way more than the retail price of the ones at Menards. Since they are on a budget, they agreed to go the cheaper rout. Jory did an $800 donation towards the car club to help cover some of the expenses, the car club is trying to see if tax and tourism will help cover expenses as anyone can use the outlets for any event.

Portable PA System Proposal - Audio Equipment Recommendation

Our current PA system has served the organization well, but it has become outdated and increasingly unreliable. Due to years of regular use, one of the speakers stands has broken, several cords have become worn, creating potential safety hazards, and the wireless microphone system frequently experiences connection issues. In addition, setup has become time-consuming, often requiring 25–45 minutes of staff time before each event to troubleshoot and ensure everything is functioning properly.

The system is also available for checkout and is regularly used by organizations, community groups, and staff for a variety of meetings, events, and public programs. This frequent use has contributed to normal wear and tear.

Replacing the system with a modern, portable solution will improve reliability, reduce setup time, enhance safety, and better support the wide variety of meetings and community events hosted by our organization and the many groups that rely on the equipment.

Wireless Speaker System

JBL EON ONE MK2 Speaker

Estimated Cost: $1,400 (per speaker- requesting 2)

Package Includes

- One battery-powered column array speaker
- Rechargeable battery
- Built-in digital mixer

Pros

- Battery powered (up to approximately 6 hours)
- No extension cords needed for most events
- Extremely quick setup (about 2–3 minutes)
- Professional, even sound coverage throughout the audience
- Built-in 5-channel mixer
- Compact design with all components stored together
- Excellent for both indoor and outdoor use
- Easy for one person to transport and set up

Protective Transport Case

Estimated Cost: $180 (per speaker case – requesting 2)

To help protect our investment, we recommend purchasing a protective transport case for the new system. Our previous speakers did not have a dedicated case, which resulted in additional wear and tear from frequent transportation and storage. A protective case will make the system easier to transport, help prevent damage during use, and extend the overall life of the equipment.

Wireless Microphone System

Shure BLX288 Dual Wireless Handheld System

Estimated Cost: $900

- Industry standard for meetings and presentations
- Excellent wireless reliability
- Simple operation
- Professional sound quality
- Durable construction
- Easy to purchase replacement microphones and parts
